Subject: HB6656

Greetings Committee Members,

Due to the inclement weather and school delays I am not able to testify in person. I am writing to oppose HB6656. I consider this proposal to be very unfair to the law abiding firearms owner. Crime static's clearly show that the majority of losses taken are not being inflicted by legal owner but by criminals. These criminals are not going to be looking for insurance on firearms that they should not possess in the first place. How will this proposal make someone any safer? You will only put the less financially solvent in a place they might not be able to own a firearm due to more costs. You will be stripping them of their constitutional rights. Please consider not passing this unfair proposal.

Thanks,

Bill Barbour
